PERSONAL PROJECTS

Mern-Stack WebSite. (09/2022 - 09/2022)

- <https://github.com/ayushbhatt14257/mern-project>
- It's a basic mern website. Where users can register and login.
- MongoDB used for storing data of user in data base. express.js is used for backend routing.
- React is used for building components for faster page rendering and node is the user for the backend.
- login is done by checking the authenticate if the user is already present in the database (MongoDB atlas) so then they can able to login.
- if the user is not present in the MongoDB database they have to register first.
- Users can only access the user profile if the user was already login it was done by storing cookies with the help of a JSON web token.
- Users can also contact us and we have filled all the user detail dynamically if the user is already login.
- The message sent by the user was saved in userSchema and added to the message filed in the dataBase.

Weather App. (07/2022 - 07/2022)

- By using basic concepts of node.js, HTML, CSS, and Javascript.
- Fetching data from third-party API and displaying it as a weather report.

To-Do's List. (06/2022 - 06/2022)

- TODO's List project is an application specially built to keep track of errands or tasks that need to be done.
- This application will be like a task keeper where the user can enter the tasks they need to do. By using frontend technology HTML, CSS, and Javascript

SKILLS

Full-sack developement

Restful Api

express.js

React.js

mongoDB

mongoos

Problem Solving

Coding

Time Management

Multitasking

Adaptability and flexibility

CERTIFICATES

Algo Expert (03/2022 - 07/2022)
